

G External cross-sectional HI state-axis projection

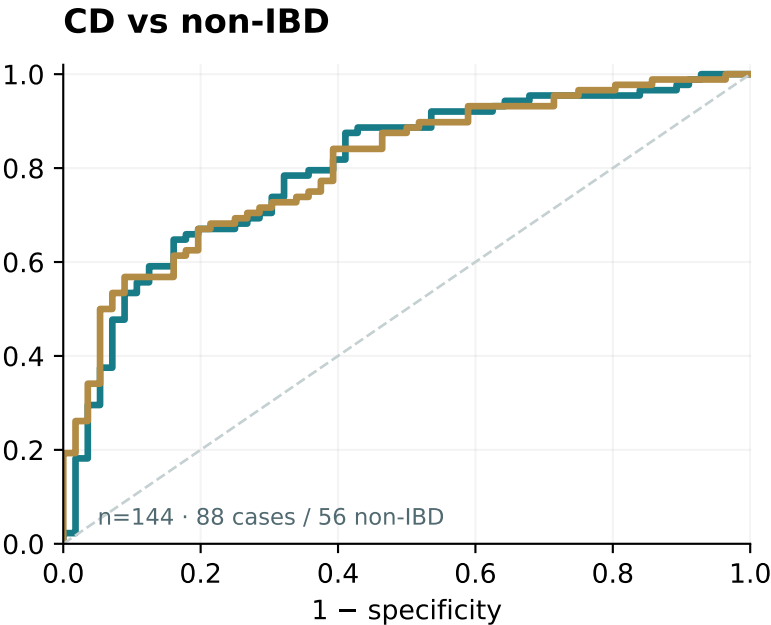

ST001000 / PR000677 · 220 samples · recoverable MBX modules · no external fitting

AUROC (95% bootstrap CI)

Primary module projection: 0.742 (0.669–0.810)

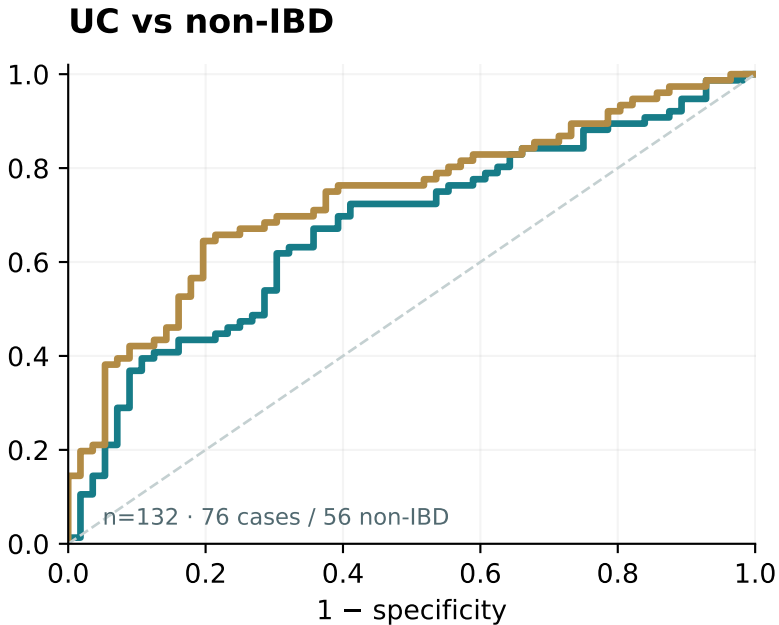

No-bile sensitivity: 0.772 (0.703–0.835)

AUROC (95% bootstrap CI)

Primary module projection: 0.800 (0.723–0.872)

No-bile sensitivity: 0.803 (0.726–0.871)

AUROC (95% bootstrap CI)

Primary module projection: 0.674 (0.582–0.764)

No-bile sensitivity: 0.737 (0.650–0.820)

External metabolic projection only; not validation of the full longitudinal EMSA-HI model. The no-bile series is a sensitivity analysis.
